**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim(s) 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Weber (3670413).

In re independent claim 9, Weber discloses a lawnmower blade assembly comprising:

a shaft (15) rotatable with a motor (10);

a stub (19, 20) in communication with the shaft (fig 2);

a blade (12);

a receiver (22) coupled to the blade (fig 4, 5), the receiver including a receiving portion (13) and at least a plurality of flexible members (13) configured for moving between outward and inward positions for engaging and retaining the stub in the receiving portion (fig 2) in a releasable engagement, the flexible members including ends configured such that pressure thereon moves the flexible members outward, allowing for at least the disengagement of the blade from the stub (as the top ends of flexible members of the receiving portion is moved outwardly the receiver is released from the stub shaft);

in re claim 10, the shaft, stub, blade, receiver are coaxial (see fig 2);

Art Unit: 3671

in re claim 11, the outer surface of the stub where the receiving portions's inner surface engages allows a sufficient but minimal amount of rotation play for the blade (see fig 2, the receiving portions on the outer surface of the shaft at ref 19, allows minimal rotation since it is not secured to the stub shaft, but rather pressure of the receiving portions keeps it engaged with the shaft);

in re independent claim 12, Weber discloses a lawnmower blade assembly comprising:

a shaft (15) rotatable with a motor (10);

a stub (19, 20) in communication with the shaft (fig 2);

a blade body (12) including oppositely disposed cutting portions (fig 6, blade 12 having oppositely disposed cutting portions) and a platform intermediate the cutting portions (as best shown on fig 4, the receiver is placed between the oppositely disposed cutting portions or in the middle of ref 12);

a receiver (22) coupled coaxially to the blade (fig 4, 5), the receiver including a receiving portion (13) and at least a plurality of flexible members (13) configured for moving between outward and inward positions for engaging and retaining the stub in the receiving portion (fig 2) in a releasable engagement, the flexible members including ends configured such that pressure thereon moves the flexible members outward, allowing for at least the disengagement of the blade from the stub (as the top ends of flexible members of the receiving portion is moved outwardly the receiver is released from the stub shaft);

Art Unit: 3671

in re claim 13, the flexible members (or spring clips 13) are spring like (i.e. can be pushed outwardly to disengage the stub shaft and when released it will press against the stub shaft; col. 2, line 18).

*Response to Arguments*

3. Applicant's arguments with respect to claims 9-13 have been considered but are moot in view of the new ground(s) of rejection.

Earlier allowed claims are now rejected in view of Weber reference provided by the Applicant.

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 7/23/2002 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
